Control

Product Overview

RollPro is a heavy-duty motor system built for reliable, long-lasting gate automation — combining rugged mechanics with smart control.

Precision Gear Mechanism — Reinforced steel drive for consistent, heavy-duty performance

Easy Lock — Quick manual release for power outages

Intelligent Control Panel — Smart settings for safe, precise operation

Heavy-Duty Wheels — High-grip rollers for smooth, quiet movement

Features & Specification

Rugged all-metal build for outdoor durability

Smart control panel with adjustable settings

Manual override for power failure situations

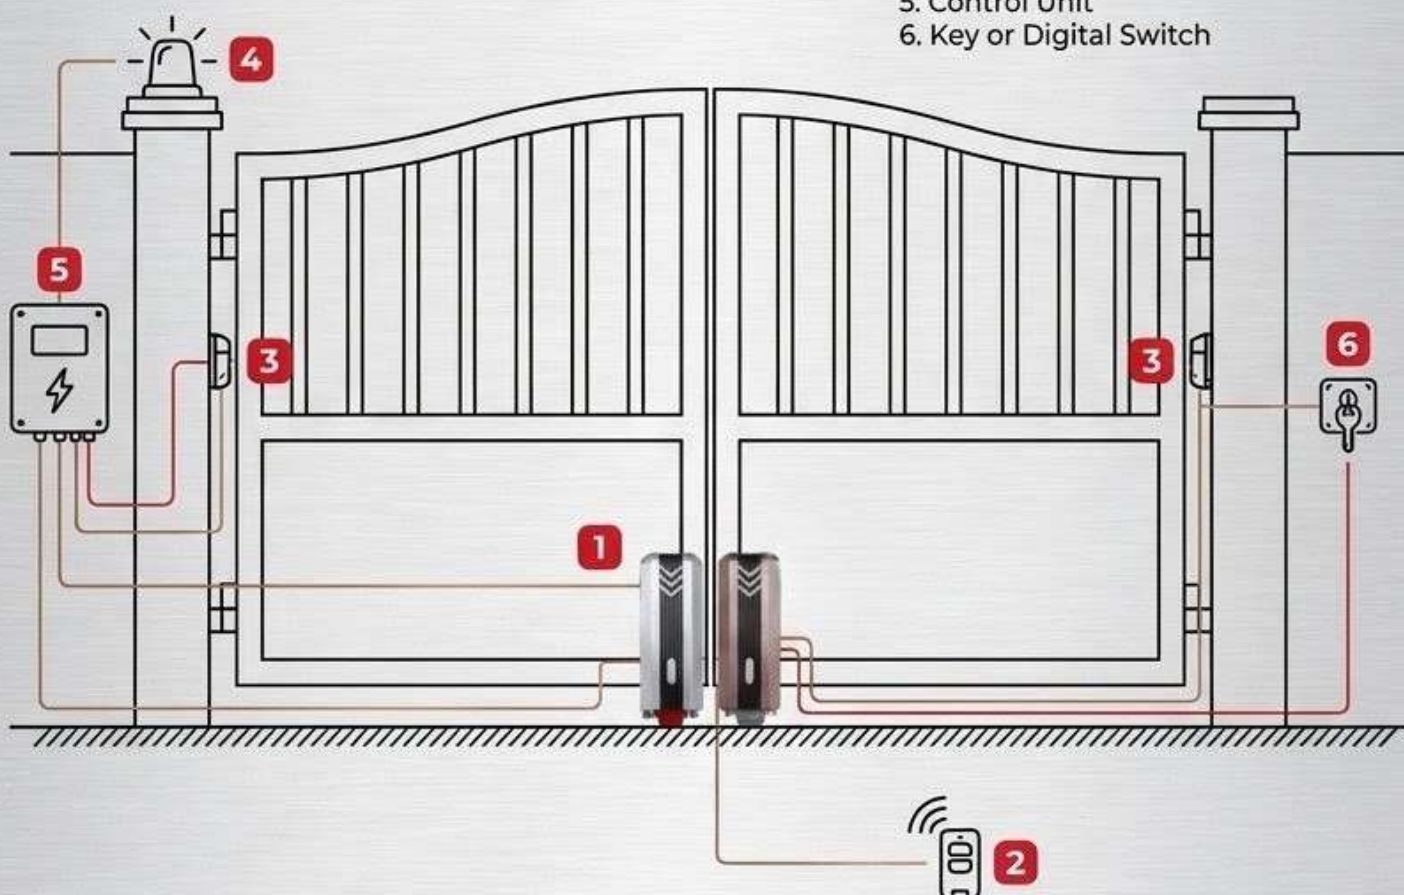

Compatible with remote, WiFi & Bluetooth

Specifications	RollPro 400	RollPro 800
Max Gate Weight	400 kg	800 kg
Motor Power	40 W	65 W
Input Voltage	220V	220V
Motor Voltage	24 VDC	24 VDC
Output Torque	6 Nm	8 Nm
Wheel Type/Size	Alloy Rubber / ABS	Alloy Rubber / ABS
Control Panel Model	OS180	OS180
Remote Type	433.92 Fixed code	433.92 Fixed code
Colour	Silver / Brown	Silver / Brown
IP Rating	44	44

Basic Installation

1. RollPro (Motor)
2. Transmitter
3. Photocells (mounted on side posts)
4. Flashing Light
5. Control Unit
6. Key or Digital Switch
